Ventus

Ventus is every bit as modern and comfortable as you would except. A high back chair with a host of adjustable features, its sleek, light appearance only adds to its capabilities. Synchronised multilock mechanism, sliding seat, 3D adjustable arms all combine to offer maximum adaptability for the user. Available with polished chrome or black nylon fittings, Ventus has the added benefit of being fitted with height and depth adjustable lumbar support. We also hope to offer Ventus with coloured mesh options in the not too distant future.
